

***CostUmE project
intends to create a new
and attractive Clothing
Technician profile and
qualification recognized
in EU (PT, ES, RO) and
to mobilize young
people and adults in
their professional
qualification in the VET
system, through the
acquisition of necessary
skills for textile and
clothing industry, by the
strong connection to
fashion, technical
textiles, home textiles,
sustainability,
introduction of new
materials and industry
4.0.***

Roadmap on Qualification Needs and WBL Good Practices

We produced 3 National reports, that present concrete skill needs and gaps in qualifications frameworks in the T&C industries (mainly in the manufacture of clothing, home textile and technical textile) and WBL good practices from each country.

You can access now the detailed final global report with all the main findings about the qualification needs and WBL good practices of the T&C sector in UE:

www.bit.ly/cstmroadmap

We also produced a Booklet on key findings on qualification needs and WBL good practices for the textile and clothing sector:

www.bit.ly/cstmkeyfindings

Clothing Technician Profile and Qualification

We developed a new and attractive Clothing Technician profile and Qualification!

The development of the new Clothing Technician Profile and Qualification is based on the real analysis of the needs of the companies/job market and the analysis of the existing professional profiles in the area of clothing in Portugal, Spain and Romania.

The partnership defined that the profile would be level 4 in EU, PT, ES, RO and that each country would adopt it to its national system. You can now access the convention for the EU profile, with detailed hours and ECVET points below:

www.bit.ly/TCQprofile

Our work in progress...

Matrix ECVET:

Will follow the descriptors (knowledge, skills, responsibility, autonomy) defining levels in the EQF. It will present precise guidelines with the profile match in Portugal, Spain and Romania. It will target all VET providers, companies, trainees and national regulatory authorities of qualifications.

Tutorial guide for mobility:

Will consist of a description of the mobility purposes with the main documents used for recognizing the mobility in Europe. It will target all VET providers, trainees, companies, trade unions, sectors associations and other entities that work or help with mobility process.

Network sessions completed!

To undertake the Clothing Technician Profile and Qualification in each partner country, partners worked intensively together.

PT, ES, RO promoted a set of Network sessions with companies and VET providers between June and September 2019. In total it involved 5 Representatives from the national authorities, 22 Representatives of the textile and clothing companies and 33 VET experts.
